

PENNSYLVANIA SILVER JACKETS EXTREME EVENT WORKSHOP

“Extreme Event” was developed as an interactive workshop that takes traditional planning methods and turns them into a fast-paced, role-playing simulation of structured public participation in extreme event scenarios.

This Extreme Event workshop is designed to address flooding. Participants will focus on two aspects of flood risk management:

- 1) identifying resources for communities to plan for, respond to, and recover from flood events; and
- 2) building community resilience through recognition of shared responsibility during extreme events.

Facilitation and leadership will be provided by representatives of the Pennsylvania Silver Jackets Team.

- The workshop will run approximately 2 hours total
- Participants will learn about flood resiliency resources and program opportunities
